Claims 1-7 and 15-21 have been cancelled.

Claims 10-14, 23, 25-26 and 28 are withdrawn from further consideration by the examiner, 37 C.F.R. 1.142(b) as being drawn to a nonelected species. Election of Species E was made without traverse in Paper No. 6.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 8-9, 24, 22 and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Best et al in view of Ishiwata et al. Best et al show a valve between a high pressure pump and a sump which in Figure 3 is shown with an annular seating area bounded by a step, formed at the right most end of 33, and a tapered portion which is read as being configured to avoid cavitation. Best et al do not use a spring. Ishiwata et al show a biased open valve with spring 40. It would have been obvious for one of ordinary skill in the art at the time the invention was made to have used such a spring in the valve of best to assist fluid pressure in opening the valve.
